EDUCATION

Higher School of Science and Technology of Hammem Sousse

2022 - Present
Bachlor in Computer Science:Software engineering and Information Systems

Metlaoui High School

2019 -2022
Diploma in Baccalaureate in Computer Science

ASSOATIVE LIFE

2023-2024

- **Team Leader Google Developer Student Clubs**

Leading the Google Developer Students Club at ESSTHS was transformative. I organized workshops and hackathons, enhancing my leadership skills and connecting with industry professionals. Managing events taught me valuable lessons in organization and problem-solving, fueling my passion for fostering a collaborative tech community at my university.

SKILLS

WEB DEVELOPMENT

- HTML/CSS/JS

FRAMEWORKS

- REACT/BOOTSTRAP

PROGRAMMING LANGUAGES

- PYTHOIN/JAVA/C/C++/PHP/MYSQL

SOFT-SKILLS

- Public Speaking
- Communication skills
- Negotiation skills
- Problem-solving skills
- Organization and time,ressources management skills

ABOUT

Passionate about turning complex problems into simple, elegant solutions through code, I am a driven computer science student seeking to leverage my skills in programming, web development, and software engineering. With a keen interest in building scalable applications and an eagerness to learn cutting-edge technologies, I aim to contribute fresh ideas and technical expertise to a forward-thinking team that values innovation and growth.

PROJECTS

MASROUFI

Masroufi is a money management app tailored for working students to efficiently track daily and monthly expenses. It calculates a maximum daily spending limit by dividing the user's salary by the days in the current month and incorporates fixed monthly expenses like rent and internet bills for a clear financial overview. A standout feature is the "savings jar," which transfers any unspent daily amount into savings, promoting better financial habits. Built with HTML, CSS, JavaScript, MySQL, Bootstrap, and PHP, Masroufi offers a user-friendly interface combined with robust functionality for effective financial management.

INTERNSHIPS

Summer Intership at Converginnov

In the summer of 2024, I completed a one-month internship at Converginnov, an innovative startup. During this time, I developed a website using React, applying my web development knowledge in a practical setting while collaborating with a talented team. I contributed to various stages of the project, from designing the user interface to implementing features and ensuring responsiveness. This experience enhanced my technical skills and improved my ability to thrive in a fast-paced environment, deepening my understanding of React and web development.
